## **Module 4**

Preventing Vertical
Transmission & Care for the
Pregnant Woman with HIV

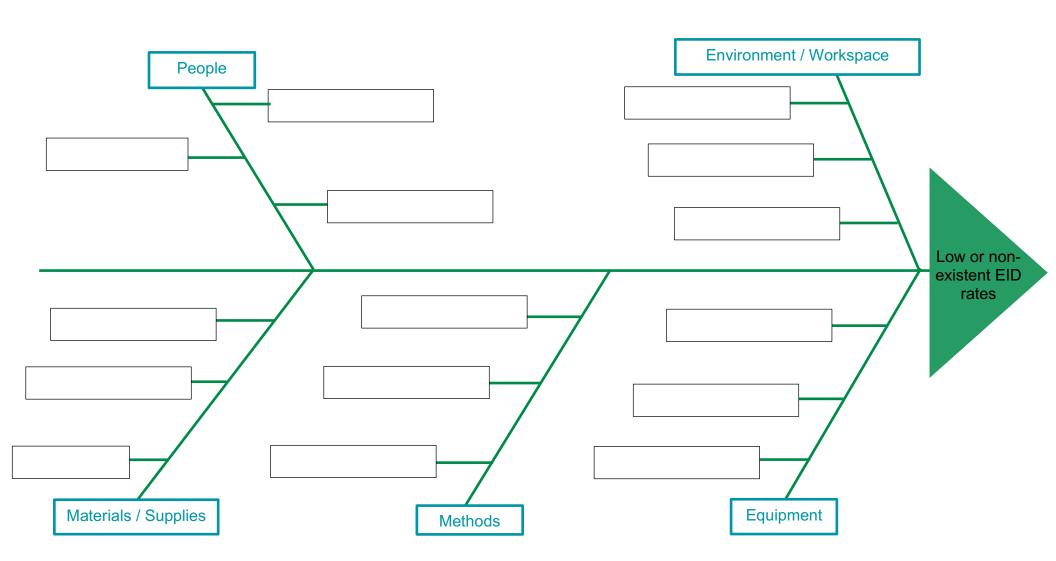

## **Activity 1: Fishbone Diagram Practice**

Along with the partners in your group, fill out the fishbone diagram to ascertain reasons why EID rates in their particular clinical setting are either low or nonexistent. List at least three reasons under each category (people, method, equipment, material/supplies, workplace/environment). Text boxes are provided but feel free to adjust box or font size as needed.

## Example of a Completed Fishbone Diagram
